

78-311/34 & 78-312/34 Quick Release Fluid Coupling

Fully stainless steel, this quick release fluid connection is a valuable timesaver in conventional spray applications where multiple lines are used or to enable disconnection of spray gun without depressurising the fluid system.

- Fully stainless steel – ideal for solvent & water based materials.
- Non-return valve in coupling – shuts off paint supply when disconnecting.
- Clear fluid passage of 4mm Ø – with no restriction of fluid flow or dead pockets to trap material.
- QRC socket & QRC stems available individually to suit your needs.
