

Industrial Solutions

WAGNER Piston Pumps - They make the difference!

Quality makes the difference

Outstanding durability, high reliability and versatility, these are the characteristics of WAGNER finishing pumps. Our pumps are designed to satisfy any application requirement from the small workshop to the large industry. The new IceBreaker pump family keeps the old virtues of excellent usability and serviceability and combines them with new features that give users the comfort they want while keeping operating costs low.

1 IceBreaker

Exclusive IceBreaker technology distinguishes WAGNER pumps from all the others. Our air motor prevents ice accumulation inside the circuit ensuring consistent performance and great power under any working conditions.

4

Thanks to the special packing-free, anti-stalling pilot valve WAGNER pumps run smooth and almost pulsation-free even at low working pressure.

3 Comfortable operation

The special integrated valve with one hand operation command makes the start-up of the pump extremely easy and smooth without adjusting the air pressure. The fluid circuit is operated from the front of the pump.

4 Ready for stroke sensor

The pump is ready to be equipped with a stroke meter. This enables the pump to be used on a TwinControl.

5 High safety standards

Special protection for the moving parts and integrated overpressure valve prevent risk of injuries to the operator.

6 Versatility and durability

Stainless steel fluid section with special self adjusting packings, thick hard chrome plated piston and tungsten carbide valve seats ensure highest durability regardless of the material used. Perfect for water- and solvent based primers or top-coats.

7 Reduce service cost

Highly durable wearing parts and quick disassembly design makes service less frequent and very easy to execute.

Great advantages for different application methods

WAGNER finishing pumps: Designed for your needs!

For high quality coatings

AirCoat

WAGNER AirCoat manual or automatic guns combined with WAGNER pumps provide fast application with superior finishing quality, very high transfer efficiency and very comfortable working conditions.

For higher transfer efficiency and top quality

Electrostatic

The new GM 5000AC in combination with an IceBreaker psiton pump spraypack offers the highest level of transfer efficiency and surface quality. You can feel, see and measure the differnce in surface accuracy and material savings.

For functional coatings

Airless

In combination with the well balanced fatigue-free WAGNER airless guns AG 14 or G 15 you will get outstanding performance durability and very productive application.

Complete product range to meet all application needs

Make your selection!

WAGNER IceBreaker® and EvoMotion piston pumps are the right choice for any kind of high pressure atomizing technology. They are readily equipped with all necessary connections and components for Airless or AirCoat applications. The huge range covers all application requirements.

TYPICAL FLUIDS

- Solvent- and water based material
- 1-K and 2-K paint
- Primer and top coat
- Low-/ medium- / high solid material
- Paints and release agent
- PU and Epoxy material

Equipment for professional paint supply

Paint supply

WAGNER offers a complete range of components and accessories required in a comprehensive paint supply system. The WAGNER Accessory Catalog guides the user to the correct selection of parts such as system racks, agitators, elevators and material regulators plus the hoses and fittings to connect the components.

- 1 Air supply
- 2 Material filter
- 3 Material box
- 4 Agitators
- 5 Drip trays
- 6 Pump rack
- 7 Level monitoring
- 8 Elevators
- 9 Suction systems
- 10 Drum covers
- 11 Wall mounts

Individual spraypacks and a wide range of accessories

Customized solutions

WAGNER offers a fully modular system which enables you to configure the spray pack to fit your application needs. Choose from 12 different pumps and then complete the package with your choice of up to 70 dedicated accessories.

1 Full range of spray guns

All WAGNER guns offer you the best ergonomics, highest reliability and unique features. Our latest developments include the new generation of GM 5000AC electrostatic guns for best performance in terms of finishing and transfer efficiency. The GM 4700AC manual AirCoat gun with patented "cage"- filter system guarantees long operation without interruption and best finishing results.

The most important part of a spray gun is the nozzle. WAGNER offers a wide range of high quality standard nozzles and special pre-atomizing nozzles. All WAGNER nozzles offer fast application speed, low overspray, high transfer efficiency with maximum application versatility and finishing quality.

2 Material hoses

Very flexible high pressure material hoses are a must for comfortable spraying operation. We offer a wide variety of hose packages ready for AirCoat or Airless applications.

3 Pump outlet

Need a filter or just a relief valve? Or do you need a complete circulation system? The modular system allows selection of just the accessories you need. Now available: The new WAGNER "cage"-filter as inline filter element.

4 Suction systems

Regardless of whether you need rigid suction pipe or an ultra-flexible suction hose – you can always find the right solution from our wide range of suction equipment.

5 Mounting equipment

Full range of mounting equipment available includes: Wall brackets, stands or big wheel trolleys.

Cage Filter - capturing the dirt!

The new patented WAGNER Cage filter was designed by meeting customer's needs. With these needs in mind the filter was developed reducing dead spaces optimizing the flush ability, extending the lifetime and make it more compact to reduce the gun size and weight.

- Easy to exchange clean filter housing
- Longer filter life time bigger chamber for dirt
- Easy to flush fast color change
- Easy to mount can't be assembled wrong

WAGNER offers a wide range of 2-K systems. TwinControl - 1 color / 1 hardener / 1 solvent include all components required to mix the material. The FlexControl family offers additional features such as automatic color changes, recipe storage, peripheral equipment interfaces. Both are available for low and high pressure applications with a very high mixing accuracy.

HP diaphragm pumps

WAGNER Cobra®

WAGNER Cobra® is a high pressure double diaphragm pump suitable for AirCoat applications up to 250 bar. The pump is completely sealed from the external atmosphere. The absence of friction, the minimum of shear and almost no pulsation make it perfect for virtually any material and application! An extremely long lifetime guarantees a high process reliability. Suitable up to 5 l/min and ideal for water- and solvent based paints, UV and reactive materials.

www.wagner-group.com

Further information on WAGNER piston pumps and on a wide variety of accessories like suction systems, mounting equipment and fittings can be found in the WAGNER liquid applications catalog.
